

Correct Mounting of the Pen Tray

If your TeamBoard does not calibrate or if the mouse cursor is stuck in one location, please make sure that your Pen Tray is not touching any part of the grey Action Bar on the TeamBoard. For instructions on how to attach the Pen Tray, please see diagram below.

EganCloth Caddy Installation:

7. Attach lip of clip extrusion (with EganCloth Caddy) to front edge of bottom frame, and flip up extrusion to snap into back lip of bottom frame as shown in (7).

Please recalibrate TeamBoard once the Pen Tray is mounted correctly.
